

Project Brief: Kiera Collins Swimming Career

I want to design a personal website for my little sister, Kiera Collins. My parents are extremely supportive of her swimming career which is going on for the past three years now as she turned ten years old. I would be delighted to host a website where her personal records, achievements, videos, and photos can be stored. I would like to create a visual website like that of Fitbit's former website. There will be multiple pages for About, Teams, Contact, and Media (photos and videos).
